Enormous realizing and short sales to-day materially affected the quoted price of stocks. The dealings were in excess of a million and a third of shares and at no time did prices of the higher valued railroad stocks reach yesterday's closing figures. Heavy sales in the early dealings were caused partily by the lower range of London quotations, and there were numerous declines exceeding a point. A sharp upward movement followed, support being extended to Michigan Central, Union Pacific Preferred, General Electric, People's Gas, Manhattan and Missouri Pacific. New Jersey Central, Tennessee Coal and Iron and Federal Steel common were also lifted. The trading element began to sell freely as the effect of heavy profit-taking was appreciated. The market at first became dull as prices receded, but the selling gradually ossumed large volumes and quotations rapidly crumbled away, eventually weakening practically all stock traded in. In the absence of umes and quotations rapidly crumbled away, eventually weakening practically all stock traded in. In the absence of onfavorable news the reaction was attributed to technical conditions. By reaching stop loss orders in the more active shares material slumps occurred in prices, with as much as a point or more difference in quotations between transactions. Money continued and the banks were expected to make another heavy gain in cash this week. The movement of money from the interior and from California continues haevy in favor of New York. The lowest price of the day was made in the final hour, and stilling at that time wiped out the gains in stocks made earlier in the day.

that London at one time sold 75,000
shares, a portion of which was taken
back on arbitrage dealings later in the
day. The resistance the market displayed in the forenoon, notwithstanding the heavy assaults made upon it by
the traders, was explained by the fact
that during the progress of the raids
several prominent interests were large
purchasers. They professed to see no
change in the situation, pointing out
that there was no danger in sight of a
scarcity of money and that the market
was likely to receive support by the
purchases made in the interest of institutions and individuals who hed large
supplies of funds seeking employment.
A number of wagers were settled to-day
when Missouri Pacific, on dividend rumors, crossed Northern Pacific common
in the forencon's trading. A feature of
the market was the resumption of activity in the middle class and low-priced
stocks.
